A screenshot of the XBMC System Settings window. The window title is "System - Settings" and it has a close button (X) in the top right corner. The top left corner shows system information: "LOG: /home/imetzger7/xbmc/temp/xbmc.log", "MEM: 1067860/1792972 KB - FPS: 43.7 fps", and "CPU: CPU0: 5.9% CPU1: 0.0% (CPU-XBMC: 5.97%)". The top right corner shows the time "8:17 PM". The left sidebar contains a list of settings categories: "Video output", "Audio output" (highlighted), "Input devices", "Internet access", "Power saving", "Debugging", and "Master lock". The main content area shows the "Audio output" settings. It includes a dropdown menu for "Audio output" set to "Analog", a dropdown for "Speaker Configuration" set to "5.1", and a "Boost volume level on downmix" toggle switch which is turned on. Below these are several checkboxes for receiver capabilities: "Output stereo to all speakers", "- Dolby Digital (AC3) capable receiver", "- DTS capable receiver", "- AAC capable receiver", "- Multichannel LPCM capable receiver", "- TrueHD capable receiver", and "- DTS-HD capable receiver". At the bottom, there are three more settings: "Audio output device" set to "Defaults (PulseAudio)", "Passthrough output device" set to "Defaults (PulseAudio)", and "Play GUI sounds" set to "Never". The bottom right corner of the window has navigation icons for back and home.
